Re: Slow down sprinklers

CC: Robert Thomas Homes

Need some help. The southeast corner of our lot is a swamp. My sprinklers go off early in the morning and again at 850AM. Neighbor at 6634 Harvest Trail have had sprinklers going off at least 4 times a day. They have told me they think there is too much water going on their lawn. One of their sprinklers also hits my yard. This is okay with me once we get the correct amount of water on the area. We have had 2 inches of rain over the past 11 days. Lawn mowers are getting stuck. Sod on the property line next to city park land is sliding around when lawn mower or I stand on it.

For now, watering once per day, maybe 4 times per week, should be enough and visiting with 6634 Harvest Trail about somewhat less water would be helpful to get this problem under control.

Thanks for your help with this.
